

# Ready for a Technology Refresh

The last thing a laboratory should deal with is obsolescent technology. Outdated instruments can cost you time and money. Working with the latest generation instrumentation means that your team benefits from faster testing, streamlined workflows, better analytics, and more confidence in your results.

Let us help you upgrade to the latest generation of Agilent HPLC, LC/MS, GC, GC/MS, ICP-MS, or other analytical instrument in your lab. Enjoy a fixed monthly payment program that works for your budget needs, with the option to upgrade at the end of the term.

## Benefits of Quantum Analytics Technology Refresh Program

- Protect against technology obsolescence
- Tax benefits: off balance sheet financing (consult your tax professional)
- Preserve capital budget for other expenditures
- Flexible end of term options
- Significant cash flow savings

**Your lab deserves the latest technology and instrumentation.**

Let's build a technology refresh program designed exclusively for your lab's needs and budget.
